

COMPANY PROFILE
2022

Throughout the years, we have always tried to ensure that the passion and enthusiasm for our work has shone through. Despite our success as an agency, we believe that it is through a great team that we have achieved our greatest potential.

We have learnt that having a platform to question and develop ideas harnesses greater creativity – although realizing creative inspiration doesn't come without its obstacles! Time management and working to tight deadlines are important in any industry, but the foundation and biggest challenges of design lie in communication.

In all our work, we have relished these challenges and used them to fuel our ambition and maintain our own high standards.

I FEEL LIFE IN COLORS

Softness Of A Baby Skin

There's nothing more precious, than the uncommon unique feeling of flesh to flesh communication. A silent conversation between a mother and her newborn. A miraculously given love, taken forever to hold and cherish. The purity of a baby skin, an infinite devotion of motherhood. The powdery smell of tenderness, the slow sound of swallowing.

The nourishing touch, the gentle breath of life, that deep look of trust. Breastfeeding, such a blessing of a soft caress! What an intense bond of affection, offered from one soul to another. It's a kiss of pastel.

Turquoise Water

The anchor was let down at the grotto's entrance. The water was this big turquoise stone spread out at my feet. In the multiple shades of blue, I took a dive and swam to the "Grotta Azzurra".

It was strictly forbidden to enter due to the high waves, but it was that what made it even more exciting. The water was extremely calm, so I slid into the sparkling serenity. The silence within the cave was mesmerizing, and I removed my swimsuit only to feel the magical freshness of the water invading my entire body.

It was a Capri Blue moment in time.

Lavender Scent

It was a beautiful day in the south of France, Provence to be accurate. A bewildering field of lavender suddenly swam into my dazzled view. The perfume of the lavenders was washing all over my skin, hands and hair. It wasn't much of a landscape that I was admiring, but an intoxicating scent I was breathing in. The lavender is a color one can smell, but never forget. It's the essence of paradise.

Falling in Love

A sentiment of eternity in a breathless moment, my heart skipped a beat as it fell, but he was there to catch it. A hug within a smile. A caress within a look. Different shades of cotton dreams. There was just one cloud in our sky, holding in its inwards raindrops of hope. Nothing, except for drizzles of intensity. Untold words hanging to a moment in time. His lips found my fingers. I took his pain away. Love promised, and Art delivered. *From the solo show: Synesthesia, 2021*

View

In love with nature's beauty and wonders, I often find myself in a perpetual search for colors. This passion that I have, alongside years of traveling to the great cities of the world and spending much time in the most fascinating museums and galleries of the world, build up the art that I have.

I see the world through passionate eyes, which allows me to notice details that are meaningless for some, but of huge importance to me. I translate them my own way, on my canvases.

I imagine forms and colors for everything I hear, smell or touch. Each piece of my work has a story and a meaning of itself, expressed in an abstract way.

I strive to pour bits of myself with every brushstroke, to make people dream, think and smile. Colors are the pivot of my creations and the tools for my senses, as they interact with me and are the essence of my lifestyle.

Those colors bring me joy and keep me far from negativities. In a world of blacks and whites, I choose colors!

How It Works: Lens Replacement Surgery

Your Perfect Blend

The laser in your eye is replaced with a synthetic alternative.

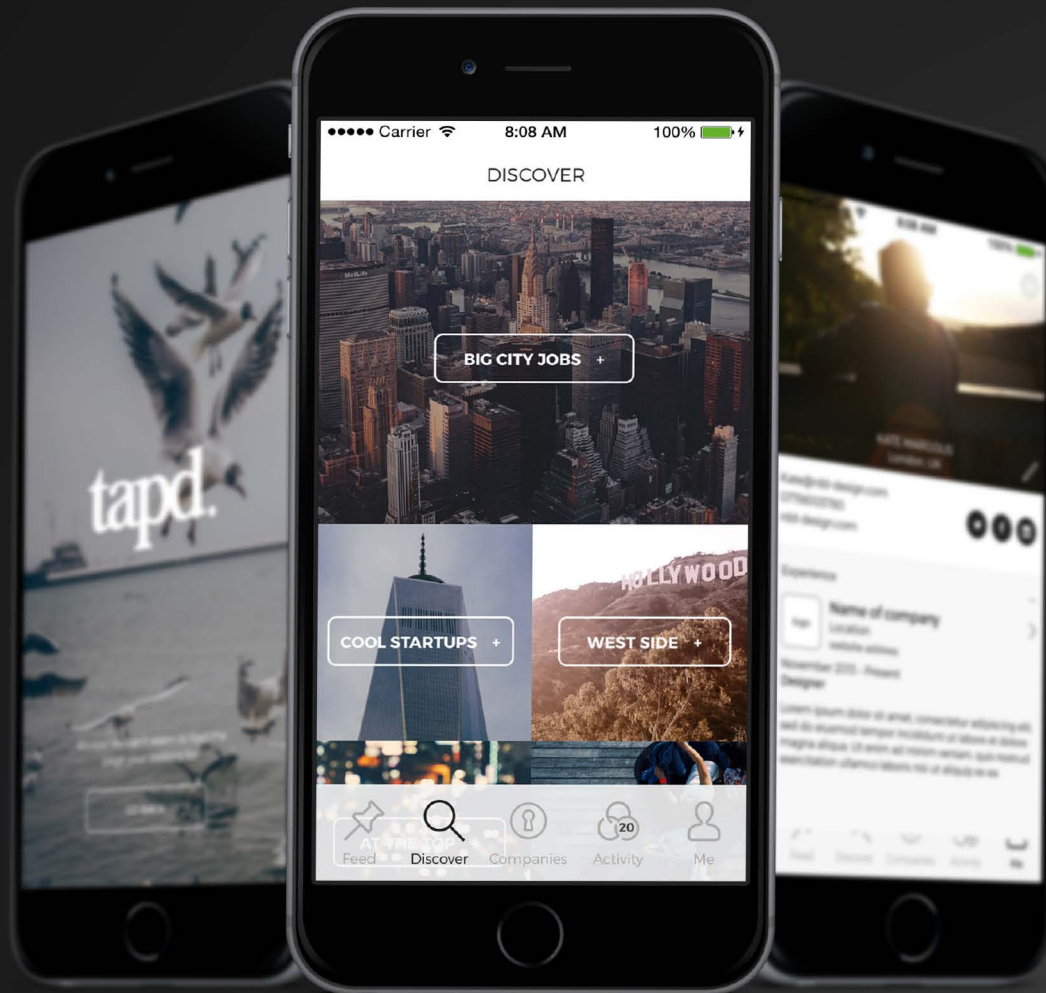

Step 1
A refractive eye drop is applied, numbing the eye and dilating the pupil from pain. We've selected the drop available to patients who are not allergic.

Step 2
A tiny camera is created within the surface of your eye, the new synthetic lens is then inserted in place.

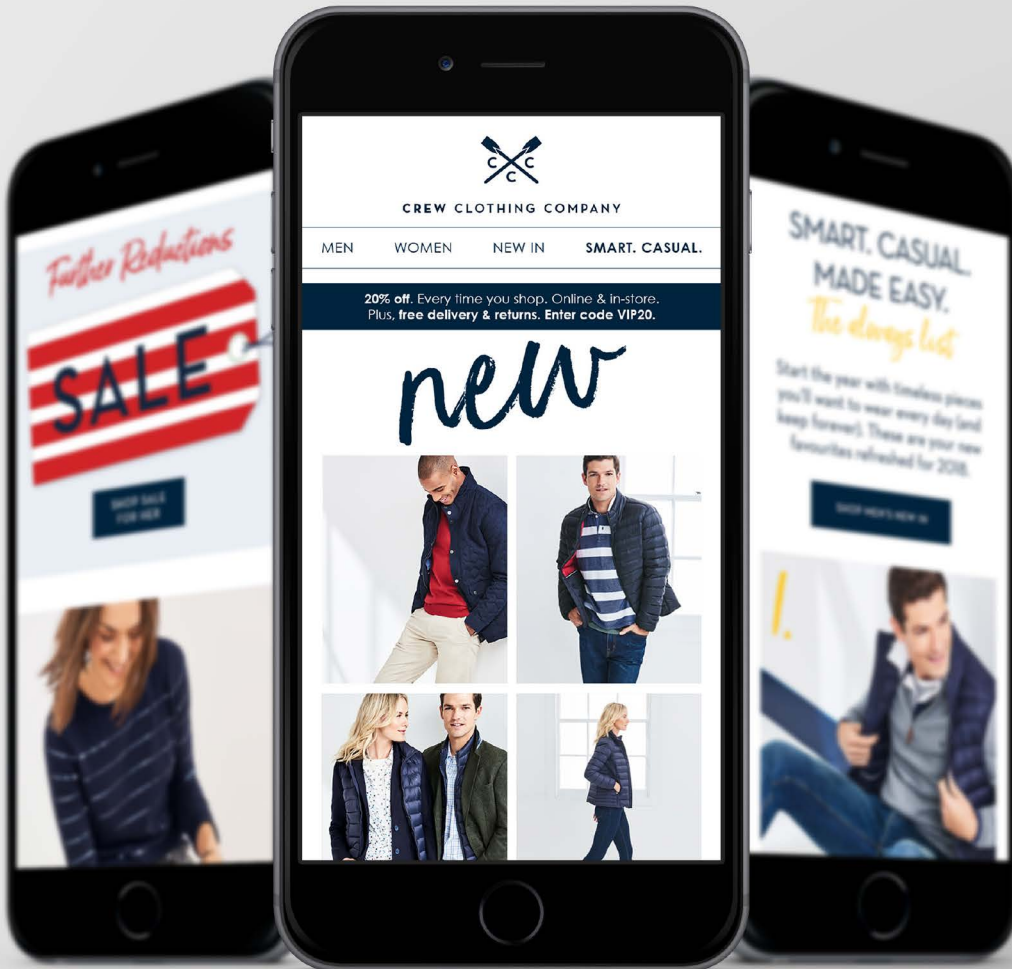

Step 3
Customised ultra-thin coating experiences light through gaps for a vibrant amount of time every year instead.
